Are honoured to invite you to participate at

IV SLOVAK PLANT HEALTH DAYS

Held on 31 May – 1 June 2011 in Nitra

With the emphasise put on the key issue

**”What changes do result from the registration, approvals and use of
plant protection products for farmers in Slovakia?”**

IV Plant Health Days key issue

The key issue and aim of this year's plant health days is to familiarise both professionals and non-professionals with the impact of new legal regulations governing the registration approvals and use of plant protection products on agriculture and forest management. The previously mentioned new regulations are generally know to become valid already in course of this year and are therefore widely debated not only in Slovakia, but also in other EU Member States as well. IV Plant Health Days have the principal intention to give floor to positions both to those Slovak and to foreign experts who are directly responsible for the implementation of new legal regulation and other stakeholders active in agribusiness. At the same time, the event will encompass a public discussion concerning the preparation of the National Action Plan of the Slovak Republic to result from “EP and Council Directive 2009/128/EC establishing a framework for Community action to achieve the sustainable use of pesticides.”

IV Plant Health Days agenda

The IV Plant Health Days in Nitra will be an international conference. On the first day, i.e. on 31 May in morning the public discussion concerning the National Action Plan of the Slovak Republic will take place. The agenda will continue by a plenary session held in the afternoon of 31 May with the discussion interpreted between English and Slovak.

The second day of the event is divided into the morning and the afternoon presentations.

On the both days, apart from domestic experts, guests from Austria, the Czech Republic, Hungary, Germany, Poland and representatives of European Crop Protection Association (ECPA) will have floor.

In addition to the key topic related presentations, also those concerning plant quarantine and plant protection will appear. Those present will have the opportunity to discuss the problems through displayed posters.

By 15 April 2011 – as usually, the event organisers expect to receive papers on relevant issues that will appear in the booklet, a traditional and inseparable proceeding from such events.

Agenda & organisation of IV Plant Health Days

1 st day	31 May	2 nd day	1 June
08.00	registration of participants	09.00	presentations
09.00	NAP SR <ul style="list-style-type: none">• opening• current situation• preparation of NAP SR• implementation of NAP SR• application of NAP SR• summary and conclusions	10.20	coffee break

IV Plant Health Days Organisational Committee will be pleased to meet a wide circle of experts in plant protection; at the same time, it begs and encourages those, who have received this invitation, not to hesitate to spread it further to their colleagues and other possible participants who may have not received it.

We are looking forward to meet you.

On behalf of the Organisational Committee

Ing. Jozef Kotleba
President
